***Election/Restrictions***

1. Upon reconsideration, it was determined that a further restriction requirement was required in this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a first battery, classified in class 429, subclass 219.
- II. Claims 19-30, drawn to a second battery, classified in class 429, subclass 218.1.
- III. Claims 31-39, drawn to a third battery, classified in class 429, subclass 188.
- IV. Claims 40-45, drawn to a fourth battery, classified in class 429, subclass 218.1.
- V. Claims 46-52, drawn to a fifth battery, classified in class 429, subclass 3.

2. The inventions are distinct, each from the other because of the following reasons: Group I requires a specific current capacity when discharged to a particular pulse discharge voltage when specifically pulsed at specific intervals at a particular current density, which features are not part of any of Groups II-V. Group V sets forth a pulse voltage of a battery at a pulse current density when discharged to 2.6V, which limitations are not part of Groups II-IV. Group II sets forth an average internal electrical resistance at a particular current density, which features do not form part of Groups III or IV. Finally, Group III recites a battery with a specific current capability, which limitation is not part of the Group IV battery.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Thursday, 6:15-3:45, and every other Friday.
